DETAILED ACTION

In response to the amendment filed on 10/05/2004, all the amendments to the claims have been entered and the action follows:

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-13 and 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Diehl et al (US 6317544).

With respect to claims 1-13 and 17-20 the rejections are maintained and incorporated by reference as set forth in the prior office action (paper #23).

3. Claims 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Diehl et al (US 6317544) in view of Piosenka et al (US 4993068).

With respect to claims 14-16 the rejections are maintained and incorporated by reference as set forth in the prior office action (paper #23).

With respect to claims 21-64 the rejections are maintained and incorporated by reference as set forth in the prior office action (paper #23).

Response to Arguments

4. Applicant's arguments filed 10/05/2004 have been fully considered but they are not persuasive. Applicant argues that the reference Diehl fails to disclose the limitations of "receive instructions from the second location, the instructions comprising an action the user of the apparatus should perform regarding the individual". Also, applicant argues that the reference Diehl fails to disclose the same features with respect to other independent claims. Examiner disagrees, and would like to point out that the limitations are given their broadest reasonable interpretations. In this instant the reference Diehl discloses a remote location "second location" that is the INS database where the data processing and the workstation is capable of receiving the communication from the INS server "second location" if there is a match or not, this communication is received by the "computer" at the first location and the instruction to the user is the match found or not to the workstation (see col. 3, lines 50 to col. 4, line 9 and col. 5 lines 9-14).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the

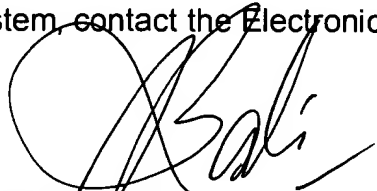

Art Unit: 2623

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
